Returned with compliments-

2. The sewerage system proposed for the extension consists of underground stoneware pipes with direct house connections-

3. 33 Two such connections are proposed for each house, the waste water from the houses being brought up to the conservancy lanes in open drains and thence conveyed into 7" pipe sewer laid along the conservancy lanes by means of gully traps and 4" branch connection-

4 34 A self-cleansing velocity of 3' to 4½' per second is generally adhered to, and due provision has been made for manholes, ventilating shafts and flushing tanks-

5 35 The pipe lines running in two different directions as at manholes 89 and 90 have a common manhole Why the flow is diverted in two different directions is not explained For the same reason, the sewer lines between manholes 105, 106, 107 and 112 do not serve any useful purpose and are considered unnecessary-

6 36 The size of the proposed 9" sub-main from the Circle in Basavangudi Extension, that is, from south-west to north-east corner of the extension, seems to be unnecessarily large It may be possibl to reduce the dimension of this to 7" up to the centre of the extension, if not to the very limit, and then gradually increase it to 9" and 12"

NOTE Contn sheet

Serial No

according to the area and population to be served Taking the population of the extension at 4,000 a yield of sewage at 12 gallons per head a day, the discharge to be provided for will be only 35 cft per second The discharge in a 7" pipe running half full is 38 cft per second This point may have to be further investigated-

7 37 The current rates for stoneware pipes alone of 7", 9" and 12" diameter are Rs 1-7-0, Rs 2-0-0 and Rs 4-2-0 per Rft respectively, whereas the estimate provides a rate of Rs 1-8-0, Rs 2-0-0 and Rs 4-4-0 per Rft respectively, including laying and jointing There may therefore be excess under this subhead, but it may be possible to meet this from contingencies and savings under house connections-

8 38 In other respects, the scheme is in order and the estimate amounting to Rs 92,342 may be approved, subject to the minor modifications referred to above being carried out during the execution of works-

9 39 An estimate amounting to Rs 97,155, for water supply to the extension has since been received from the Superintending Engineer, Sanitary Circle This is being forwarded separately.

Chief Engineer of Mysore.

NOTE— Contn sheet

Submitted to His Highness

84 In Government Order No 2493-5/M1 87-1(-48 dated the 4 h August 1918, sanction was accorded to the formation of the Viswesrapuram Extension at an estimated cost of Rs 3 63 64C but before this sanctioned estima e was received by the Chairman of the Bangalore City Improvement Committee the cost of materials and labour was found to have risen high with the result tha no contractor came forward to take up the work at the es ima ed - rates nor was it possible to carry out the work departmentally at the sanctioned rates

85 The work was therefore entrus ed to a con ractor by name Reyappa with a slight modification in rates As the work progressed some additional items not included in the sanctioned estimate were found to be necessary for the comrlete formation of the extension The estimate had therefore to be revised in the Chairman s office and this amoun ed to Rs 5 2 1(C involving an excess of Rs 1 61 460 over he sanctioned estimate

86 The revised estimate received from he Chairman of th Improvement Committee having been sent to the Chief ngineer for scru iny, it was returned duly scrutinised for Rs 5 27,65 involving an excess of Rs 1 6 C1[illegible] o er the original estimate

87 In view of the fact tha estimate for he duplication of the water main ha since een separately sanctioned the provision made for this item in the revised estimate referred to above had to be omitted A new provision had also to be made for the underground drainage of the extension as the general scheme for the whole city in which this had been included will not be sanctioned for some time to come for lack of funds to finance the whole scheme So the estimate was returned to the President of the City Municipal Council for further revision on the lines indicated He has submitted a modified estimate for Rs 4C 241 against the original first estimate for Rs 3 63 64C involving a net excess f Rs 1 6

88 The Municipal Council will finance the scheme entirely fro the funds realised from the sale of sites in the exten ion a i

20

has amounted till now to Rs 6 76 943

4) As the works are of a rather technical character and require professional supervision consider it necessary to subject them to the scrutiny of the Superintending Engineer Sanitary Circle, during execution This point will be made clear to the Municipal Council while issuing orders

5) The plans and the revised estimate may be graciously approved by His Highness

K. P PUTTANNA CHETTY, ESQ., C.I.E.,
Chairman, City Improvement Committee,
Bangalore.

To

B. Ramaswamaiya Esq ,B A ,B L ,
Secretary to the Government of His Highness the
Maharaja of Mysore, Revenue Department,
B a n g a l o r e.

SIR,

Adverting to Government Proceedings No.2493-5/M1 87-17-48 dated 14th August 1918, sanctioning an estimate amounting to Rs.3,63,640/ for laying out the Visvesvarapuram Extension and No R 9230-1 M1 2-10-11 dated 13th February 1920, sanctioning a supplemental estimate for Rs. 9,475/- for gravelling certain roads of the extension, I have the honor to submit herewith, for sanction of Government, a revised estimate amounting to Rs 5,25,100/- for laying out the said extension with the necessary plans, report, and statements relating to the same

2 The City Improvement Committee and the Municipal Council have, after full discussion, approved the revised estimate. Copies of their resolutions dated 10th July 1920 and 7th August 1920 respectively approving the same are herewith submitted for the information of Government

3 Full reasons for the necessity for a revised estimate and for the excess over the original sanctioned estimate are given in the accompanying report, the main reasons being the increase in the value of materials and labour and the additional work found to be necessary for the complete formation of the extension as the work progressed. The revised estimate does not include the smaller estimate for Rs.9,475/- sanctioned for gravelling the roads in the extension.

4. The extra cost viz Rs.1,61,460/- will be met from the sale

proceeds of sites in the said extension

I have the honor to be,

Sir,

Your most obedient servant,

Chairman,
City Improvement Committee,
Bangalore

To

B Ramaswamaiya, Esq., B A , B L ,

Secretary to the Government of Mysore,

Revenue Department, Bangalore

D No 6940
15-3-21

Sir,

With reference to correspondence ending with this office No B 7206 dated the 15th February 1921, I have the honour to return herewith, duly scrutinised, the revised estimate amounting to R$ 5,~~25,100~~ 27655 for laying out the ------- Visveswarapuram Extension, Bangalore

2 The excess over the sanctioned estimate amounts to R$ 1,64,015 or nearly 45% The excess due to higher rates to be paid to the contractor for work done is only R$ 4,253/- and this not much The excess on other items due to under-estimating both in quantity and cost is very heavy

3 The quantities now estimated for are as per actual requirements and the rates provided are those now prevailing

4 The provision made in the revised estimate for all items of work appears to be sufficient, except in the case of water supply and underground drainage

5 The lump sum provision of R$ 35,000 provided for the

'1'

is quite inadequate, as water supply to the Extension will have to be given from a separate main, the one in the Fort Centre -- Road being already overtaxed As such, the cost will not be - less than Rs 1,50,000/-

6 For underground drainage, a lump sum of Rs 76,266 is --- provided In the absence of detailed drawings, it is not ---- possible to say if this will suffice The scheme has not --- been worked out in detail This will have to be done before - work is started

7 Storm water drains do not appear to have been designed - according to actual requirements It seems possible to cut - down the sizes of these drains This will have to be carefully worked out in the case of all drains and culverts and cost --- reduced wherever possible

I have the honour to be,

Sir,

Your most obedient servant,

V. Ayyaswami Iyer

FOR CHIEF ENGINEER OF MYSORE.

SIR

With reference to your letter No R 11024 M1 42-20-32 dated the 4th April 1921 calling for the remarks of the City Improvement Committee on the observations of the Chief Engineer re the revised estimate for Rs 5,25 100 for laying out the Visvesvarapuram Extension, I have the honor to submit herewith, for the information of Government, a copy of the resolution of the City Improvement Committee dated the 9th instant in the matter together with the report of the Executive Engineer City Improvement Division therein referred to and the detail plans and estimate for the sewerage of the Extension

2 Regarding the observation of the Chief Engineer in para 5 of his letter that provision of Rs 35 000 for water supply is inadequate and that the cost on this account will not be less than Rs 1 50 000, as a separate main may have to be laid to the Extension I have to state that, as pointed out in the resolution of City Improvement Committee it does not seem at all reasonable to debit the entire cost of Rs 1,50 000 of the duplicate main to Visvesvarapuram Extension only, since the additional main is required not solely for the new Visvesvarapuram Extension, but more urgently for the proper service and adequate supply of water to the already inhabited portions of the City at the southern end of the existing main, viz western portions of Chamarajapet, Shankarpur and southern part of Basavangudi

Extension, where the water difficulty is too well known and the improvement of water supply service cannot be delayed any longer So that, apart from the question of water supply to the Visvesvarapuram Extension, the laying of the duplicate main is an imperative neces ity The quantity of water that may have to be drawn from the main to suprlv the Visvesvarapuram Extension may not exceed roughly 1/6 of that to be supplied to the other localities mentioned above What seems a legitimate charge on account of the duplicate main, that may be debited to the Visvesvarapuram Extension and included in the estimate is only the proportionate cost of laying the additional main, calculated on the proportion of water drawn to the Visvesvarapuram Extension. If this is 1/6 then 1/6 of Rs 1,50 000 or Rs 25 000 may be considered as a fair share to be borne by the Visvesvarapuram Extension towards the cost of the duplicate main in addition to the provision of Rs 35,000 already made in the estimate The City Improvement Committee are of opinion that the provision under water supply may accordingly be raised from Rs 35 000 to Rs 60,000 I request that the Government may be pleased to accept the City Improvement Committee's recommendation and issue orders to the Public Works Department to take up the water supply of the Extension on hand as early as possible 22 houses have been built and occupied 38 houses are now under construction For want of water, not only are those who have built houses suffering inconvenience but also the others have not been making earnest attempt to start construction

3 Regarding observation in para 6 of the Chief Engineer's letter, a detail estimate amounting to Rs.92,342 with plans, sections and statement of discharges for the sewerage of the Extension, duly approved by the City Improvement Committee, is herewith submitted The excess of Rs 16,076 over the lumpsum of Rs 76,266, originally provided will be met from the sum of Rs 21 226 provided in the revised estimate for slabbed drains in conservancy lanes, as such drains will not be found necessary when pipe sewers are provided, as in Shankarpur Extension

37

4 As regards the observation of the Chief Engineer in para 7, the storm water drains have been designed according to the area commanded by each drain, allowing for a 2" run off per hour A statement of discharge calculations is herewith appended

5 The enclosures to your letter under reply are herewith resubmitted

6 This is a self supporting scheme & funds are furnished by the Municipality

I have the honor to be,

Sir,

Your most obedient servant,

Chairman,
City Improvement Committee,
Bangalore

M E M O 38

Regarding para 5 of the Chief Engineer's letter, the lumpsum provision of Rs 35 000/- for water supply is made only to meet the cost of submains and distribution not the main

The Chief Engineer has however decided that the Visvesvarapuram Extension cannot be given water supply unless the main is duplicated in the Avenue road and the cost of it viz Rs 1 40 000 is borne by the Municipality in addition to the cost of the submain and distribution pipes Since the duplication of the main is intended not only for the supply to the Visvesvarapuram Extension but more for the adequate supply of Chamarajapet Shankarpur and Basavangudi Extension it seems rather hard to put the whole cost on the Visvesvarapuram Extension which requires a sixth of the supply of the other extensions It may therefore be reasonable to charge only 1/6 of the cost of duplicate main to the Visvesvarapuram Extension i e, Rs 23 000 or 25 000 if at all, so that if approved the cost may be raised from Rs 35 000 to Rs 60,000

Regarding para 6

Detail plans and estimates with an explanatory report are herewith submitted A lumpsum provision of Rs 76 266 for underground drainage of Visvesvarapuram Extension was made in the revised estimate

The detail estimate works out to Rs 92 342 against the lumpsum provision of Rs 76 266 This however does not include, as in the original estimate the cost of the submain No 8 ~~through~~ through the diagonal road which is a part of the general sewerage scheme of the City and is included in the part estimate of Rs 1 20 820 extracted out of the general estimate as most urgently needed and the sanction for which is pending before Government The excess of Rs 16,076 in the present detail estimate for street sewers may be met from the amount of Rs 21 226 for slab drains in the conservancy lanes since there is no necessity for them when sewers are provided, as in Shankarpur Extension

Regarding para 7

Calculations are submitted for the following sections of storm water drains based on those allowed in the revised estimate $7\frac{1}{4}$' x 6' 4' x $5\frac{3}{4}$' 4' x 5', $5\frac{1}{8}$ x $4\frac{1}{2}$' and $4\frac{7}{8}$ x $3\frac{3}{4}$' which will show that the sizes are not excessive

XX XX XX

5 Letter No R 11024/M1 42-20-32 dated 4th April 1921, from the Secretary to Government, Revenue Department calling for certain additional information re the revised estimate for laying out the Visvesvarapuram Extension

Also report of the Executive Engineer, City Improvement Division, accompanied by plans and detail estimates of the sewerage of the extension, furnishing the information called for

Resolution -- (1) Regarding the provision to be made in the revised estimate for water supply to the Visvesvarapuram Extension, it does not seem quite reasonable to debit the whole cost of Rs 1,50 000/- of the separate or the duplicate main to the Visvesvarapuram Extension only Since the additional main is more urgently needed for an adequate water supply to the City and already existing extensions - western portion of Chamarajapet, parts of Shankarpur and southern portions of Basavangudi —, the duplicate main would be necessary even without the Visvesvarapuram Extension The quantity of water that may be drawn from this additional main by the Visvesvarapuram Extension is not likely to exceed 1/6 of that drawn by the other parts of the City Therefore, proportionate charges towards the initial cost of the duplicate main calculated on the quantity of water supply require for the Visvesvarapuram Extension, may be included in the revised estimate, in addition to Rs 35 000/- provided for sub mains and distribution

(2) The detail plans and estimate for Rs 92,342/- for the efficient sewerage of the Visvesvarapuram Extension are approved

41

excess of Rs.16,076/- over the lumpsum provision of 76,266/- being met from the provision of Rs 21,226/- made for slabbed drains in conservancy lanes, as such drains are now superfluous.

(3) The calculation and discharge statements prepared by the Executive Engineer for certain sections of the storm water drains show that the sizes provided for drains are not excessive These calculations may now be submitted to Government for all storm water drains except the V slab drains

Office of the President,
City Municipal Council,
Bangalore Dated 20th May 1922

From

Ananda Rao Sirsi Esq B A , L L B ,
President,
City Municipal Council,
Bangalore

To

A V Ramanathan Esq, B A,
Secretary to Government,
Revenue Department, Bangalore

Sir,

With reference to your letter No L 6312/M1 42-20-52 dated 26th April 1922 returning the plans and Revised Estimate of the Visveswarapuram Extension with instructions to modify the Revised Estimate on certain lines indicated in your letter, I have the honour to submit the modified Revised Estimate, together with the full file of plans and detail Estimate, report, calculation sheets etc

2 In modifying the Revised Estimate as now submitted, I beg to explain as follows -

(1) The provision for flood water drains has been reduced from Rs 1,33,490/- to Rs 1,12,264/- by deducting Rs 21,226/-

(2) Instead of reducing the provision for Electric lighting from Rs 30,000/- to Rs 22,728/-, I have omitted these charges altogether since according to the rules of the Electric department the capital charges of installing the street lights is borne by that department, the Municipality being required to pay only the royalty of Rs 30/- per [illegible] per annum

(3) The provision for underground sewerage is raised from Rs 76,266/- to Rs 92,342/- And to this I have also added, as explained in the Estimate Rs.28 756/- being the cost of

of the sub-main, into which all the sewage of the Extension should have to discharge This sub-main forms a link in the general sewage scheme submitted to Government, and its cost had therefore been included in the general Estimate as the latter is not likely to be taken up in the near future separate provision for the sub-main has to be made and included in the Estimate for the Visveswarapuram Extension

(4) The provision of Rs 35,000/-, for water supply made in the former Revised Estimate, is raised to Rs 53,980/- according to the detail Estimate furnished by the Executive - Engineer, Water supply Division for laying the "distribution" pipes for service within the extension area, The said Estimate for Rs 53,980/- has been returned to the Executive-Engineer, water supply Division countersigned by the Chairman City Improvement Committeeand me As per your personal instructions to the Executive Engineer, City Improvement Division, no charges relating to the duplicate main are included in this Estimate

3 The Revised Estimate thus modified amounts to Rs 5,40,24I against the original Estimate of Rs 3,63,640/- involving a net excess of Rs I,76,60I/-

I have the honour to be,

Sir,

Your most obedient servant,
